

AUTOMAT COLLECT C240

» A NEW LEVEL OF CONTROL

C240 collector takes control of product distribution management to the next level. It is an OEM auxiliary device. Works together with vending machines equipped with a MASTER user panel.

It can accept any type of product with a total capacity of up to 240 liters. Intuitive management of the C240 Depository is ensured by the user panel installed in the main MASTER machine that controls the drop box. The automatic opening of the loading hatch makes the use of the device it is intuitive. The applied solution causes the execution of the return user-friendly. Each user knows exactly the moment at which can make a refund.

The video system based on an internal camera enables precise recording returned products and works independently.

Thanks to the option „Return the product to download a new one“, the safe guarantees 100% control over releases and returns. The machine will not deliver the product if the worker will not return the used one. There is a container inside the device, we enable it in a quick and easy way and ergonomic collection of used products in bulk, which is easy can be transferred for utilization or regeneration. They will not be left by workers on the factory premises or thrown away.

MASTER machine allows for up to 14 vending collectors.

Available in OEM version
