

# VENDING MACHINE F80

» SPIRAL MACHINE FOR UNUSUAL SOLUTIONS

The F80 is a self-service machine which automatically dispenses up to 80 different types of products. Based on spring feeders, it allows you to store very large quantities of products in a small space. Intuitive management is provided via a touch screen. Product loading is quick and easy. The F80 can be connected to a barcode reader and an auxiliary machine without a user panel.

## DIFFERENT TYPES OF SPRINGS ON PRODUCTS

The impressive loading capacity of the device is obtained thanks to the possibility of using different types of spring winding in as many as 36 configurations. It offers the possibility of installing up to 8 shelves, with 10 springs available for each, which can be combined in pairs for larger products. The configuration of the springs is unlimited, as single and double springs of different sizes can be installed on a single shelf at the same time. The easy change of settings allows the capacity of the machine to be adapted to the current operating requirements. In addition, the shelf is equipped with sliding blocks, inner spring slides, and various partition heights which make it possible to dispense products with different geometries and packing patterns.

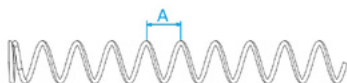

Vending machine available with or without user panel

TECHNICAL SPECIFICATIONS	WITHOUT PANEL	WITH PANEL
Height [mm]	1920	1920
Width [mm]	900	1160
Depth [mm]	900	900

CAPACITY [SPIRALS OF ONE TYPE]		
6		480
9		720
12		960
15		1200
18		1440
24		1920

OTHER		
Operating temperature [°C]		5 - 40
Weight [kg]	350	357
Current consumption [watts]	standby: 12 / distribution: 25	
Voltage [V]	230 / 1 A	
Permissible load [kg] (per shelf)	25
